

Strategic aims

1. Green infrastructure

To develop a strategic approach to green space provision for multiple public benefits, with Greenwood being recognised as a leader for this approach within the East Midlands

2. Landscape regeneration

To facilitate new woodland planting and other landscape change, taking into account the green infrastructure strategy and the needs of biodiversity, landscape character and adaptation to climate change.

3. Caring for greenspace

Support partners in managing and promoting local greenspaces to improve their quality and to gain a greater recognition of their many benefits for the community.

4. Community engagement

Champion the involvement of volunteers and community groups in caring for greenspace.

5. Access for all

Encourage wider participation and enjoyment of the countryside from under-represented and disadvantaged groups

6. Health

Encourage more people to use greenspace for physical activity and so to gain health benefits

7. Woodland economy

Stimulate new ways of gaining financial benefit from woodlands, to support the local economy and encourage sympathetic woodland management.

8. Climate Change

Assist in the process of adapting to the consequences of climate change

9. Promoting the partnership

Increasing recognition of Greenwood's value and achievements, particularly to support further funding bids.

10. Sustaining the partnership

Securing increased funding from a wider range of sources, to allow partners to deliver additional benefits for the environment and community.
